

Giacomo Giacometti

A new scientific humanism

Seven chapters on narrative medicine and precision medicine

Narrative medicine and precision medicine, two schools of thought, two research laboratories, will meet at this scientific event.

They are clinical and research areas – one that capitalizes on the fundamental aspects of human interaction, and the other that exploits innovative processes of the biomedical sciences – that are both expressions of a person's communicative profiles, whether narrative or omics-based.

Meyer Open Access

The meeting is targeted at the national and international scientific community and will be available via streaming at: www.meyer.it

● *Event accredited with 12 CME credits by Age.na.s*

Meyer Children's Hospital
February 18-19, 2016
Conference Hall 1

Foreword - Why we're here

Chapter I - The paradigm

Chapter II - Training

Chapter III - The headlines

Chapter IV - The change

Chapter V - The wards

Chapter VI - Narrative medicine and precision medicine: a contamination

Chapter VII - Perinatal epigenetics

Epilogue

February 18, 2016

8.30 - 9.00 **Opening remarks**

9.00 **Foreword**

9.00 - 9.10 **Alberto Zanobini** – CEO, Meyer Children’s Hospital

9.10 - 9.30 **Why we are here: the emancipation of care**

Gianpaolo Donzelli – Professor of Pediatrics, University of Florence; President, Meyer Children’s Hospital Foundation

9.30 Chapter I - The paradigm

9.30 - 9.35 Presented by: **Monica Toraldo di Francia** – Lecturer, Breyer Center for Overseas Studies, Stanford University; Italian National Bioethics Committee

9.35 - 9.55 **A narrative future for medicine**

Brian Hurwitz – Professor of Medicine and the Arts, Director of the Centre for Humanities and Health, King’s College London

9.55 - 10.15 **Health democracy and its ambiguities: an outsider’s reflection on narrative and medicine**

Carlo Ginzburg – Professor of Italian Renaissance Studies, University of California Los Angeles

10.15 - 10.35 **Facing health inequalities: opportunities and challenges for promoting health, development and social justice**

Erio Ziglio – Special Guest Lecturer, Management Center Innsbruck; Former Head of Office, European Office for Investment for Health and Development

10.35 - 10.55 Discussion

10.55 - 11.25 *Coffee break*

11.25 Chapter II - Training

11.25 - 11.30 Presented by: **Maurizio de Martino** – Professor of Pediatrics, University of Florence

11.30 - 11.50 **The use of narrative in medical education**

Stephen Ludwig – Medical Director, International Medical Education, The Children’s Hospital of Philadelphia

11.50 - 12.10 **A Ph.D. in narrative medicine: how to promote the development of a relational mind**

Chiara Fioretti – Applied Research Division for Cognitive and Behavioral Sciences, European Oncology Institute, Milan

Andrea Smorti – Professor of Developmental and Educational Psychology, University of Florence

12.10 - 12.30 **The use of literature to learn how to listen to the patient**

Donatella Lippi – Associate Professor of the History of Medicine, University of Florence

12.30 - 12.50 Discussion

12.50 - 13.50 *Lunch buffet*

13.50 Chapter III - The headlines

13.50 - 14.20 **Science, medicine, profession: a narration by Giuseppe Remuzzi, interviewed by Luca Carra**

Giuseppe Remuzzi – Professor of Nephrology, University of Milan; Director, Nephrology and Dialysis Department, “Papa Giovanni XXIII” Hospital; Mario Negri Research Institute

Luca Carra – Journalist, Editor-in-Chief of Scienceonthenet

14.20 - 14.40 Question and answer session

14.40 Chapter IV- The change

14.40 - 14.45 Presented by: **Massimo Resti** – Director, Interdisciplinary Specialist Department, Meyer Children’s Hospital

14.45 - 15.05 **Narrative medicine between art, science and philosophy**

Alberto Granese – Professor Emeritus of Education, University of Cagliari

15.05 - 15.25 **Person-centered medicine**

Alfredo Zuppiroli – Cardiologist, Tuscan Regional Health Agency

15.25 - 15.45 **Individualized research and translational medicine**

Andrea Frosini – Intellectual Property Manager, Toscana Life Sciences Foundation

15.45 - 16.05 **Narrative medicine and sustainable healthcare**

Maria Giulia Marini – Research and Health Care Director, ISTUD Foundation

16.05 - 16.25 Discussion

16.25 Conclusions from the first day

- 9.00 Chapter V - The wards**
- 9.00 - 9.05 Presented by: **Carlo Dani** – Professor of Pediatrics, University of Florence; Director, Neonatology and NICU, Careggi Hospital
- 9.05 - 9.25 **A new culture for birth: looking toward the past**
Gian Carlo Di Renzo – Director, Obstetrics and Gynecology Clinic, University of Perugia; Secretary General, International Federation of Gynecology and Obstetrics
- 9.25 - 9.45 **Giving a voice to newborns**
Mario De Curtis – Professor of Pediatrics, “Sapienza” University of Rome; Director, Neonatology, Pathology and Neonatal Intensive Care Unit, “Umberto I” Hospital of Rome
- 9.45 - 10.05 **Narrative medicine in neonatology**
Massimiliano Zonza – Pathology and NICU, University Hospital of Cagliari
- 10.05 - 10.25 **Guidelines for the use of narrative medicine in the clinical environment for rare and chronic degenerative diseases**
Amalia Egle Gentile – Psychologist, National Center for Rare Diseases, National Health Institute
- 10.25 - 10.45 **Narrative medicine in cardiology**
Stefania Polvani – Director, Health Education Center, Local Health Authority of Florence
- 10.45 - 11.05 **The values shared by caregivers**
Giulia Bazzani – Organizational Health Office, Meyer Children's Hospital
- 11.05 - 11.25 Discussion
- 11.25 - 11.55 *Coffee break*
- 11.55 Chapter VI - Narrative medicine and precision medicine: a contamination**
- 11.55 - 12.00 Presented by: **Elisabetta Cerbai** – Professor of Pharmacology, University of Florence
- 12.00 - 12.20 **At the confluence of narrative medicine and precision medicine: what lies downstream?**
Kathleen McGreevy – International Relations Office, Meyer Children’s Hospital
- 12.20 - 12.40 **Life narrated by the deciphering of the genetic code**
Orsetta Zuffardi – Professor of Molecular Medicine, University of Pavia
- 12.40 - 13.00 **The use of stem cells in personalized medicine**
Paola Romagnani – Professor of Nephrology, University of Florence; Director, Nephrology and Dialysis Service, Meyer Children’s Hospital
- 13.00 - 13.20 **“Narrative molecules” in the perinatal laboratory**
Vassilios Fanos – Professor of Pediatrics, University of Cagliari; Director of Pathology and NICU, University Hospital of Cagliari
- 13.20 - 13.40 **Point-of-care personalized management of infectious disease**
Chiara Azzari – Associate Professor of Pediatrics, University of Florence; Director, Immunology Clinic and Scientific Coordinator, Meyer Children's Hospital
- 13.40 - 14.40 *Lunch buffet*
- 14.40 Chapter VII - Perinatal epigenetics**
- 14.40 - 14.45 Presented by: **Nicoletta Berardi** – Professor of Psychology, University of Florence
- 14.45 - 15.05 **270 days to write your future**
Irene Cetin – Professor of Obstetrics and Gynecology, University of Milan; Director, University Fetal Research Center, “Luigi Sacco” Hospital
- 15.05 - 15.25 **The developing brain**
Renzo Guerrini – Professor of Child Neuropsychiatry, University of Florence; Director, Pediatric Neurology Department, Meyer Children’s Hospital
- 15.25 - 15.45 Discussion
- 15.45 **Epilogue**
- 15.45 - 15.50 Presented by: **Salvatore De Masi** – Research Office, Meyer Children’s Hospital
- 15.50 - 16.10 **After listening to the “seven chapters”**
Benedetta Fantugini, Martacappelli Foundation, “Lorenzo de Medici” University, Florence
